BUREAU OF CHEMISTRY—Circular No. 16, Revised.

H. W. WILEY, Chief of Bureau.

OFFICIALS CHARGED WITH THE ENFORCEMENT OF FOOD LAWS IN THE UNITED STATES AND CANADA.

[Revised to July 1, 1907.]

INTRODUCTION.

The widespread interest in food legislation during the last few years has led to the recent enactment of laws in a number of States where such legislation had not previously existed, and to the enforcement in other States of earlier legislation for which no appropriations had previously been made. As a result, an increasingly large number of inquiries are received for the addresses of officials charged with the enforcement of the laws in different States and the names of chemists and other officers engaged in various capacities in the same work. It is to meet this want that the present circular is issued.

At the present time a serious attempt is made in thirty-seven States and Territories of the United States and in Hawaii, the Philippine Islands, and Porto Rico to enforce more or less extensive regulations relating to the purity and wholesomeness of food. The growing interest in this matter is well illustrated by a comparison of these figures with those of 1905, when only twenty-five States and Territories in the United States and Hawaii and Porto Rico really enforced food laws. These numbers do not include the States in which laws have been enacted without appropriations for their enforcement. There are only fourteen States and Territories now that have no food laws with appropriations and machinery for their enforcement, and of these five are Territories and come within the provisions of the Federal food and drugs act of June 30, 1906. Of the nine remaining States two have recently enacted laws which, while they can not have a marked effect upon the markets at the present time, show the sentiment of the people and give hope that appropriations will soon be made. The funds appropriated by the several States for the enforcement of the food laws are increasing, which fact results in a larger corps of employees and more efficient inspection.

The information in the succeeding pages was obtained from replies to a circular letter sent to the authorities charged with the enforcement of the laws in the several States. If this information is incomplete or in any respect erroneous, corrections are requested from any who notice such defects, in order that future editions may be free from such inaccuracies.

Acknowledgments of data furnished for this circular are made to Mr. Theodore L. Cole, Washington, D. C., and to the food commissioners of the various States. The collection of the data and their compilation are the work of Miss N. A. Parkinson, of the Division of Foods.

Chief, Division of Foods.

ENFORCEMENT OF FEDERAL LAWS.

The United States laws relating to the food supply are enforced by the Department of Agriculture and the Treasury Department, and the Secretaries of these two Departments, together with the Secretary of Commerce and Labor, are empowered to make uniform rules and regulations for carrying out the provisions of the food and drugs act. Appointments of officials for this service are made from an eligible list established upon examination by the United States Civil Service Commission, and are permanent. These laws are enforced in the several bureaus of the two Departments as follows:

DEPARTMENT OF AGRICULTURE.

Board of Food and Drug Inspection.

The board of food and drug inspection, appointed by the Secretary of Agriculture and reporting to him, is charged with the administration of the food and drugs act of June 30, 1906. The personnel of the board is as follows: H. W. Wiley, Chemist and Chief, Bureau of Chemistry; F. L. Dunlap, Associate Chemist; and G. P. McCabe, Solicitor of the Department.

Bureau of Chemistry.

The Bureau of Chemistry is charged with the preparation of the data on which the execution of the food and drugs act is based, including the collection of samples and the examination of the same. This act forbids the manufacture and sale of adulterated or misbranded foods and drugs in the District of Columbia and the Territories, their importation into the United States, their exportation from the United States (unless the substance conforms to the laws of the foreign country to which shipped), and their sale in interstate commerce. The officials of the Bureau conducting this work are as follows:
